Github - Linkedin - Whatsapp

## EDUCATION

**Obafemi Awolowo University (OAU)** – Ile-Ife Nigeria                2019 – Till Date

**Bachelor of Technology:** Electronics and Electrical Engineering

## PROJECTS

SMALLCHOPS ECOMMERCE WEBSITE: I cloned the smallchops.ng website with its full ecommerce functionalities and its animations. The website was totally built with react and scss while I used GSAP for the animations. React router was employed in routing pages and components.

MUSIC WEBSITE: This is a website that allows users to play, pause, shuffle, reduce and increase volume, forward, play next and perform other music website functionalities. Website is not responsive.

PANDANFT WEBSITE: This is a neat figma design I converted into pixel perfect website with react and scss. Website has clean UI and nice filtering system.

PORTFOLIO WEBSITE:I built my portfolio website with html, css and javascript where I have other projects incorporated. All websites are fully responsive (except stated otherwise) on all devices.

## WORK AND EXPERIENCE

**Freelancer on fiverr**                                (December 2021 – December 2022)

WEBFLOW E-COMMERCE (custom Javascript code on webflow): I used JavaScript in creating a reusable e-commerce functionality in webflow website, a calculator which allows buyers to make changes and then calculates with the input. I also added full password check to ensure password entered by signed up users has at least a number, a letter, uppercase, 8 characters and no space.

CRUD with Spreadsheet (html, css, javascript, google sheets): I created a website that allows users to submit their information to the admin's Spreadsheet. The admin can access from their website the users information and they can edit, delete (perform all CRUD operations ) on it.

LANDING PAGES (Html, Css, Javascript): I built landing pages with html, css and javascript and all are nicely designed and animated to client's taste with the full functionalities.

## LEADERSHIP/TEAM WORK:

- Collaborated with no-code developers to make full websites with required functionalities by improving the CMS with css and javascript codes
- Started training four people on html, css and javascript .

## TECHNICAL SKILLS

**Skills:** HTML, CSS/SASS, Javascript, React GSAP, Redux, Styled component, Github, Firebase, Google sheets

**Language:** English (fluent)
